

Bernite 35 AR Case Study

Problem to be solved:

Effectively remove the shellac coating and various tablet colorings from process equipment at the customer's laboratory

Application:

Used at an ambient temperature, Bernite is used to clean food grade coatings from stainless/steel equipment and from floors and walls around the equipment

What is different today?

After a number of trials, the customer has access to more supply, lower pricing and better technical service with Bernite and Hubbard-Hall

Other comments:

Bernite is Safer: FDA and NSF approved

Bernite is Faster: works faster and just as effective as competitive products
