

*Chemistry & Expertise for Manufacturing's Toughest Problems*

## Core Preparation

Hubbard-Hall brings chemistry and expertise to unique core preparation challenges facing today's remanufacturers.

### Applications for Core Preparation

- Cleaners
- Conversion Coatings
- Derusters
- Mass Finishing
- Metal Strippers
- Paint Strippers
- Rust Preventatives

### Non-Negotiable Checklist

Mixed metal and soil contamination make core preparation a complex task. Hubbard-Hall brings over 100 years experience in metal finishing and 625 custom products to help you solve this complex task. Our technical team have developed a non-negotiable checklist so you can identify the best application for your core preparation process.

#### Core Preparation Checklist

✓ Identify the Part	Size, Weight, Blind Holes
✓ Identify the Substrate	Steel, Aluminum, Copper, Cast Iron, Non-Metallic
✓ Identify the Contamination	Oil/Grease, Carbon, Oxides
✓ Storage Considerations	Long term, Short Term, Shipping Concerns
