Commodity Trends:

- **Jobs Report:** The Bureau of Labor Statistics announced that the U.S. economy added 138,000 net new jobs in May, well below Economist’s expectations. The unemployment rate declined to 4.3%, its lowest level since 2001. Manufacturing lost 1,000 jobs, construction gained 11,000 new employees. Health care and business services led the way in May, adding 24,000 and 38,000 jobs respectively.
- **Retail Sales:** The Commerce Department said on Wednesday retail sales fell 0.3 percent last month after an unrevised 0.4 percent increase in April. May's decline was the largest since January 2016 and confounded economists' expectation for a 0.1 percent gain.
- **Manufacturing:** The Institute for Supply Management said its manufacturing index edged up a 10th of a point to 54.9%. Economists expected a reading of 55%. Readings above 50% indicate expansion.
- **U.S. Auto Sales:** U.S. new vehicle sales in May came in at 1.54 million units, compared with 1.53 million units, a year earlier. Auto sales hit a record high of 17.55 million units in 2016. But as the market has begun to saturate, automakers have been hiking incentives to entice consumers to buy.
- **U.S. Home Sales:** The National Association of Realtors said on Wednesday existing home sales increased 1.1 percent to a seasonally adjusted rate of 5.62 million units last month, the third highest monthly level in a decade.

The graphs below represent a one year price trend for comparison only and do not reflect end user delivered prices. Additional 1-month trend percentages have been included on each commodity reported.
