

Better Chemistry. Better Business.

Commodity Trends:

- **Jobs Report:** The Bureau of Labor Statistics announced that the U.S. economy gained 211,000 jobs in April. That number is a sharp rebound from March, when fewer than 100,000 jobs were created. The unemployment rate fell from 4.5 to 4.4 percent, the lowest level since 2007.
- **Retail Sales:** The U.S. Department of Commerce on Friday said that retail sales increased 0.4 percent in April. Sales ticked up just 0.1 percent in March and fell in February.
- **Manufacturing:** The Institute for Supply Management (ISM) said its index of national factory activity dropped to a reading of 54.8 last month, the weakest reading since December, from 57.2 in March.
- **U.S. Auto Sales:** Overall car sales fell 4.7% to nearly 1.43 million, with an 11.1 % percent decline in car sales from April 2016, according to industry tracker Autodata. Industry analysts such as Edmunds and Kelley Blue Brook had projected industry sales declines of 5% and 3.1% respectively for April 2017.
- **U.S. Home Sales:** The National Association of Realtors reported that existing home sales climbed 4.4 percent for the month, while economists were expecting a smaller increase of 2.5 percent.

The graphs below represent a one year price trend for comparison only and do not reflect end user delivered prices. Additional 1-month trend percentages have been included on each commodity reported.
