Commodity Trends:

- **Jobs Report:** The Bureau of Labor Statistics announced that total Nonfarm payrolls increased by 161,000 new jobs in October. Total hourly wages — now averaging \$25.92 an hour — are up 2.8 percent year over year, the strongest annual growth in wages recorded since the recession.
- **Retail Sales:** The Commerce Department said that Sales at retail stores increased 4.3 percent from October 2015, the biggest advance since November 2014. Sales improved in 11 of 13 major categories for a second straight month in October.
- **Manufacturing:** The Institute for Supply Management on Tuesday said its purchasing manufacturers’ index rose to 51.9 in October from 51.5 in September. A reading above 50 indicates that factory activity is growing, while a reading under 50 signals contraction.
- **U.S. Auto Sales:** Sales of new cars and trucks fell an estimated 4 percent in October as consumer demand waned, according to Autodata Corp. October was the fifth month of sales drops in 2016, a sign this year could fall short of last year’s U.S. record of 17.5 million sales.
- **U.S. Home Sales:** The National Association of Realtors said Tuesday that sales of existing homes rose 2 percent to a seasonally adjusted annual rate of 5.6 million, making October sales the strongest pace since February 2007.

The graphs below represent a one year price trend for comparison only and do not reflect end user delivered prices. Additional 1-month trend percentages have been included on each commodity reported.
