

Hubbard Hall Quick Drop Clay Blends

Hubbard Hall's line of Aquapure[™] Quick Drop blends provide a one step treatment for a variety of waste water applications. These blends are formulated into a single product for simplifying and streamlining treatment to remove contaminants. Aquapure Quick Drop blends contain conditioners, clays and flocculants as a package product for easy addition and a "Quick Drop" of contaminants. See chart below for application recommendation. Dosages should be determined by jar testing but usually fall in the range of 1-3 oz/ gallon.

HUBBARD-HALL AQUAPURE QUICK DROP APPLICATION GUIDE
