Industrial Paint Strippers For All Applications

Hubbard-Hall's paint stripping product line, Aquastrip, offers coatings removal for metal and non-metal substrates. We are on a mission to prove that you can make money with your stripper by providing real time process improvements and cost savings. Switch to Aquastrip and you could realize savings of up to **\$330,000** and increase productivity by **50%**. Aquastrip is used for hook and rack stripping, masking material re-use, parts re-work and remanufacturing.

Why Aquastrip?

- Environmentally friendly
- REACH approved options
- Works with multiple substrates
- Low operating temperature
- Varied solution concentrates
- Removes paint, powder, e-coat, CARC and organic coatings

Top Three Aquastrip Products

• **Aquastrip ACB** - Excellent for stripping masking materials for re-use & Military CARC Coatings.

• **Aquastrip 1200** - Specifically designed to strip steel substrates, works well on hooks & racks.

• **Aquastrip XCEL** - Works with all metals, is fast acting, free rinsing and does not contain NMP.

Features	Aquastrip ACB	Aquastrip 1200	Aquastrip XCEL
pH	4-7	10-12	10-12
Recommended Operating Temperature	140-170° F	150-200° F	150-200° F
Concentration	50-100%	50-100%	50-100%
Soak Time	As Required	As Required	As Required
Substrate(s)	All Metals & Masking Materials	Ferrous Metals	All Metals

Make Money With Your Stripper

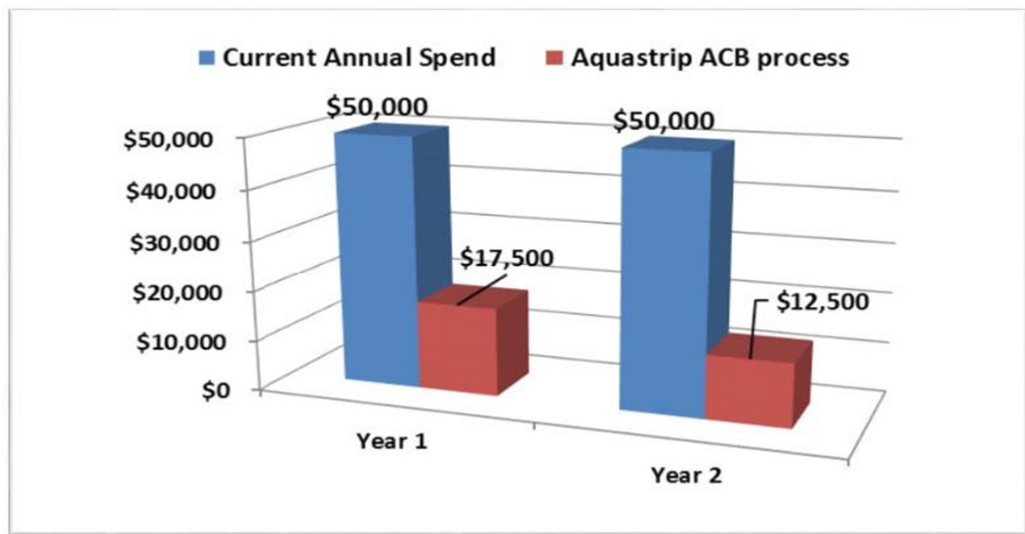

Aquastrip ACB can reduce masking material expenses by 85%

Add it up...How much do you spend on masking materials every year? It could easily be between \$5,000 to \$50,000 or more. Although the use of these materials is necessary, they offer little additional value to your products and are simply an expense.

Aquastrip ACB provides an easy and painless way to drive that expense right to your bottom line. Companies that powder coat, electro-coat and paint can save up to 85% of their annual expense of masking materials and plugs by reusing them up to 6-7 times after stripping with Aquastrip ACB.

"Hubbard Hall helped us save 85% of our annual expense on masking materials." Tru-line MFG.

Ready To Switch?

Hubbard-Hall's process experts can map out an affordable turnkey paint stripping system. Recommendations usually include a proper tank, filtering system, circulation, heating and baskets and, of course, our Aquastrip ACB.
