

“Every day, they’re looking to remove 1 or 2 percent cost. We came into their facility, utilized the Aquaease® Infinity technology, and got them a 37% reduction in their costs”

Hubbard-Hall’s Mike Frechette, speaking about a customer success

# Aquaease Infinity®

## Featuring Arbortech Membrane Technology

Ready to reduce your cleaning costs by 37%?

Aquaease® Infinity is the first cleaning chemistry co-developed for use with a membrane system. This system allows you to reclaim up to 98% of your cleaning bath rather than throwing out used cleaner, which can reduce waste and your total cleaning costs by 37% or more.

### Cost Savings Example

|                                    |           |
|------------------------------------|-----------|
| Annual cleaner spend               | \$100,000 |
| Amount of cleaner lost to drag out | \$35,000  |
| Reclaim efficiency                 | 98%       |

**Annual cleaner chemistry saved: \$63,700**

**Total savings after lease is factored in: \$37,300**  
 (lease cost is \$2,200/month)

Aquaease® Infinity cleaners retain their efficacy. Left: A “ready to dump” oil saturated cleaner. Right: Aquaease Infinity cleaner after the membrane process.

### Why Aquaease Infinity?

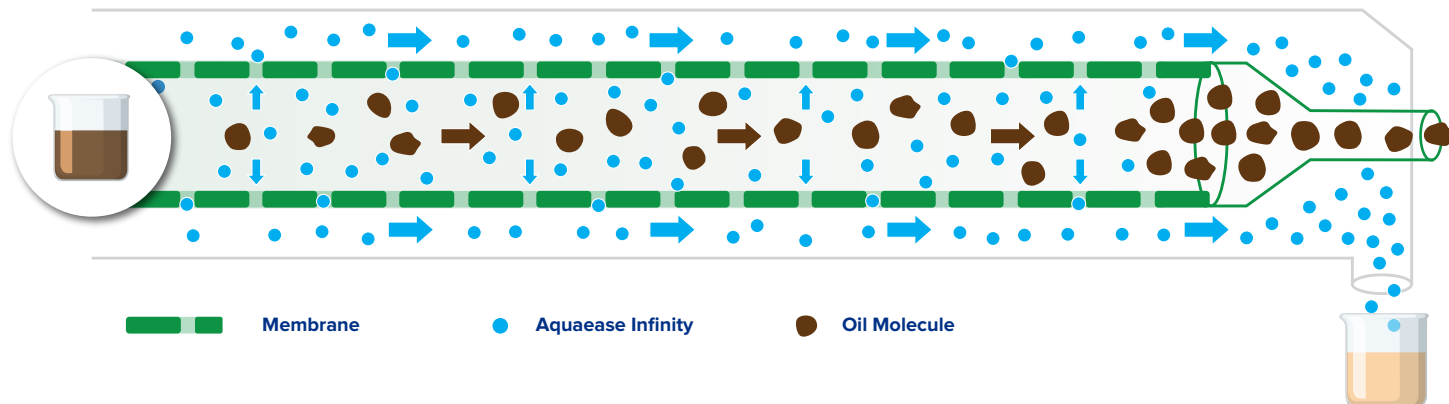

- Eliminates defects caused by oil-saturated cleaners
- Reduces cleaning costs by 37% or more
- Reclaims 98% or more of your cleaner
- Reduces waste and BODs
- Easy to get started with no-risk trial and no-capex lease

### Key Features

- Works for a full pH range (0 to 14)
- Works in temperatures up to 200°F

## How it works

Many cleaners are not suitable for membrane technology, so the membrane removes good cleaning components along with soils. Aquaease® Infinity was specifically designed for use with Arbortech membranes. The membrane separates the cleaner from the oil and soil, allowing the cleaning components to pass through its pores while trapping the contaminants inside. The reclaimed full-strength Aquaease® Infinity cleaner returns to the cleaning bath, fresh as new.

## Steps to Implementation

- 1 **Bench test**  
Tests suitability of Aquaease Infinity for your contaminants
- 2 **Demo unit**  
Risk-free trial to optimize cleaner, unit efficiency and membrane porosity
- 3 **Ready to go?**  
Start saving money on day one with our 3-year lease program

## Lease Program

- No capital expenditure - savings start on day one
- Term: 3-year lease
- Includes all routine maintenance: membrane, regeneration pump, thermocouple, solenoids

## Our people. Your problem solvers.

Expertise you can trust.

32% of Hubbard-Hall associates are in tech support, customer service or sales. This means that you get answers fast while the rest of our team gets your order delivered on time and in spec.
