

Actol 60, Acid Inhibitor

Acid Activator & Inhibitor

Actol #60 is an inhibitor and smut eliminator for use in hydrochloric acid cleaning baths. Actol 60 acts to prevent or minimize the attack of the acid on the base metal and in addition promotes a smut-free surface caused by over pickling or etching.

Actol #60 eliminates black smut residue from over pickling and provides a bright surface finish without slowing down the attack on rust, scales and oxide.

Actol #60 helps to extend the life of acid pickling systems by reducing over attack on base metals. Improves subsequent coating performance by providing a cleaner and more receptive substrate.
