

Acid Salt Additive

Acid Salt Additive is a neutral low foaming detergent additive for use in acidic, alkaline and water miscible solvent cleaning systems.

Acid Salt Additive increases cleaning performance, improves rinsing characteristics and helps inhibit tarnishing.

Acid Salt Additive may also be used by itself as a neutral immersion washing detergent. It is safe for use on virtually all metals and works equally well in hard or soft water.

Applications

Soak Tank Additive: Add directly to acidic or alkaline cleaning solution at an initial concentration of ¼ to 1% by volume.

Caution

Avoid contact with eyes or prolonged contact with skin. May be harmful if swallowed. Wash thoroughly after handling.
