

# Aquapure™ Nutrient U

Aquapure Nutrient U is a nitrogen rich soluble food source utilized by microorganisms in wastewater treatment. Aquapure Nutrient U allows healthy growth and maintenance of a microbe population during the secondary biological process in industrial wastewater treatment. The rate of biological growth is enhanced using Aquapure Nutrient U in conjunction of a soluble source of phosphate. In general, a ratio 5 to 1, nitrogen to orthophosphate is recommended to maintain the best biological conditions. Enough nutrients and proper ratios are essential for rapid metabolic growth. Allowing a small excess in the effluent is important to detect enough nutrients are being used.

## Features & Benefits

Allows for healthy growth and maintenance	Nitrogen rich food source for secondary biological treatments
Works with a ratio of 5 – 1 with a phosphate source	This product is essential for rapid metabolic growth
Liquid, soluble source for nitrogen	Easy to use, easy to meter in for nutrient

## Physical Data

Physical state	Liquid
Odor	Slight ammonia
Color	Clear
% urea	40%
pH	Neutral

## Caution
