

AquaPure™ SLA-30

Aquapure SLA-30 is rapid settling, particularly in the metal finishing industry. This flocculant is an easy to use polyacrylamide that offers consistent, predictable performance over a wide range of sludge characteristics and operating conditions. The technology in the synthesis of Aquapure SLA-30 is new with several advantages over many similar polymers available on the market.

Features & Benefits

Easy to use liquid emulsion	Lower viscosity concentrate that mixes easily with water for uniform make down
Medium charge density for wide application	For rapid settling of floc
Specially formulated anionic flocculant designed to enhance performance of floc formation	Formulated to work under a wide variety of temperature and pH ranges

Physical Data

Appearance	Milky white liquid
Non-volatile solids	36% – 42%
Viscosity	500 – 2,500 cps
Odor	Slight

Typical Applications

- Flocculant for massing together pin floc in a wide variety of liquid/ solid separation
- Filter aid for sludge dewatering
- Paper and pulp- retention and drainage aid
- Food processing
- Tanneries
- Oil refineries

Caution

DO NOT FREEZE

WARRANTY: HUBBARD-HALL INC. IS NOT RESPONSIBLE FOR THE MISUSE, MISAPPLICATION, OR MISHANDLING OF THIS PRODUCT.
