

AquaPure™ DW-45

Aquapure DW-45 is a blended liquid coagulant formulated to meet the diverse needs for clarification operations in industrial, mining, laundry, food processing and municipal applications.

This unique coagulant offers the effectiveness of a highly charged aluminum complex salt with organic components for better clarification and liquid/solid separation.

Aquapure DW-45 can be used to replace alum, ferric, lime and other inorganic coagulants. Dosages range from ½ to 2 mL/Gal depending on the system design, loading and mixing action.

Aquapure DW-45 can be used as is and is easily metered into any system for the desired effect.

Features & Benefits

Produces equal or better results at much lower dosages	Minimizes volume of sludge generated Produces a more easily dewatered sludge generated
Works across a broad range of pH and alkalinity	Does not alter pH of treated water
Liquid ready to use	Poses fewer problems in handling and feed
Can be used alone or with high molecular weight flocculant polymers	Is unaffected by chlorination

Physical Data

Specific gravity	1.16
Color	Clear to light straw tint
Form	Liquid
Odor	Sweet odor
