

AquaPure™ Quick Drop 85

Aquapure Quick Drop 85 is a proprietary blend of clay minerals, polymer and pH adjusting agents which allow entrapment or encapsulation of emulsified oils and dissolved metals from various wastewater streams. This one-step application offers a simple alternative to multiple tank treatments while ensuring that the treated effluent will meet POTW discharge limits established by local and state authorities. Aquapure Quick Drop 85 captures solids and masses them together to quickly settle suspended particulate. This clay blend has a higher % conditioners in the formulation than the Aquapure Quick drop. The use of this product requires vigorous mixing.

Features & Benefits

Easy to use granulated blend	Long shelf life
One step coagulant/flocculant	Quickly drops massed suspended particles
Clay blend	Works well to entrap oils

Typical Applications

- Works well on tubing wastewater to drop suspended particulate
- Parts washer cleaners
- Vibratory deburring wastewater
- Mop and scrubber wastewater
- Paint, ink, and dye waters
- Dye penetrant bearing waters
- Adhesive and latex glue wastewaters
- Corrugating waste

Operating Conditions

Dosing should be determined by jar testing on a 250 mL wastewater sample. A beginning dose for a 250 mL jar test is typically 0.5 gram per 250 mL with high speed mixing. This can be increased in increments of 0.5 gram until the desired clarity is obtained. The higher the solids the higher the dose. Dosing per gallon can be 1/4 oz to 4 oz per gallon of wastewater.

Aquapure Quick Drop 85 comes in semi –granular form and is available in 50 lb bags.
