

Super Detox

Super Detox is a liquid acidic cleaner which may be used in the removal of rust, weld scale or heat scale from steels and iron, oxides and tarnishes from copper, brass and bronze alloys.

Features & Benefits

High concentration	Lower inventory footprint
“Wetted”	Cleans while de-oxidizing; lower rejects, higher productivity
No chelating agents	Easier waste treatment; total lower cost of use

Operating Conditions

Super Detox may only be used in immersion or tumble operations (open barrel, self-tumble):

Concentration	5% – 50%
Temperature	Ambient to 130°F (54°C)
Ventilation	Required when operated above Ambient temperature
Tanks	Rubber lined, Polyethylene, Polypropylene, Koroseal, PVC, or fiberglass

Waste Disposal

Neutralize solutions of detox or Super Detox to a pH of between 6.0 and 8.0 with soda ash or lime. The soda ash or lime should first be dissolved in water before adding to the detox solution. Add the alkaline solution slowly since neutralization generates heat.

In order to be completely informed on the latest waste disposal regulations for your immediate area, please contact the local authorities.
