Aquapure™ T-1000

Product Code: 2601106
Revised Date: March 20, 2015

Aquapure™ T-1000

DESCRIPTION

Aquapure™ T-1000 is a concentrated, liquid metal precipitant blend for chelated heavy metal. This product has been formulated for metal removal from the effluents of plating baths, etchants and rinses containing heavy metals. **Aquapure™ T-1000** can be used prior to the addition of Hubbard Hall coagulants for best reduction of recalcitrant heavy metals.

Aquapure™ T-1000 produces a dense, black floc with the addition of Aquapure anionic flocculants for easy removal by clarification in a typical system.

FEATURES

- Easy to use liquid
- Can be monitored thru the use of ORP
- Can be metered in for easy dosing
- Reduces most divalent metals with low dosing
- Reduced Odor

TYPICAL APPLICATIONS

- For metal reduction in plating rinses
- For treatment of metals in chemical etchants
- For all rinses containing soluble metals
- To be used on any chelated metal stream

PHYSICAL DATA

Color.....	Straw Yellow
Sp. Gr.....	9.67
Freezing point.....	58 degrees F
% volatile.....	> 60%
pH.....	pH concentrate is 13-13.5
solubility in water.....	80% Soluble
Odor.....	Slight amine odor
