Emerald ICP 1

(Heavy-duty environmentally friendly soap based cleaner for all substrates)

Emerald ICP 1 is an environmentally friendly mildly alkaline, low foam, water soluble, liquid cleaner developed for cleaning ferrous metals, copper, brass alloys, stainless steels, aluminum, nickel alloys, and nickel coated substrates. It may be used as an immersion / soak clean, agi-dip soak cleaner, ultrasonic cleaner, or as a spray cleaner in spiral washers. **Emerald ICP 1** cleans and brightens most copper alloys.

Emerald ICP 1 is formulated using surfactants (detergents) and water-soluble solvents that are listed as environmentally acceptable by a third party certification body. It contains no phosphates, borates, caustic, nitrite, or silicates.

Emerald ICP 1 will emulsify and disperse hard to clean soils such as lard, sulfurized, and chlorinated based stamping, forming and drawing oils, general shop oils, and synthetic lubricants. It is excellent at removing fine particulate soils, commonly referred to as smut, from deep drawn and stamped parts.

Emerald ICP 1 may be used as an ultrasonic cleaner to remove buffing compounds from aluminum, brass, bronze, steel, and stainless steel. It may also be used in mass finishing operations as a cleaner and burnishing de-burring compound. When used in mass operations of brass, copper, and copper based alloys it will product a lustrous bright finish offering short-term tarnish resistance.

FEATURES

- Concentrate liquid
- Safe
- Rapid soil removal
- Non-corrosive
- No phosphates
- Emulsifies most soils
- Effective particulate removal
- Leaves corrosion resistant film
- Eliminates flash corrosion and imparts lubricity
- Multiple uses

BENEFITS

- Rapidly mixed, less down time
- Lessens or eliminates worker complaints
- High productivity
- Less equipment maintenance and replacement
- Simple waste treatment
- Long solution life
- Eliminates smut a common quality issue
- Eliminates multi-product inventory.

Emerald ICP 1

Product Code: 2053055
Revised Date: 03/19/2010

OPERATING CONDITIONS

When used as a cleaner:

Concentration: 3 to 10% by volume. Typical: Spray 3-5%. Immersion 5-10%
Temperatures: 150 to 200F (65 – 93C).
Time: 2 to 10 minutes.
Equipment: mild steel tank and heating coils.
Ventilation: To remove water vapor.

When used as a mass finishing compound:

Concentration: 3 to 5% (volume).
Temperature: Ambient
Time: 5 to 60 minutes depending on application.
Equipment: Vibratory finishing mills, tubs and oblique barrels.
Ventilation: Not required

TITRATION PROCEDURE

1. Using a 100 ml Graduated Cylinder, pour 300 mls of cleaner into a 500 ml Erlenmeyer flask.
2. Add 20 drops Bromocresol Purple Indicator.
3. Titrate with 0.5 N Hydrochloric from purple to a yellow end point.

$$\% \text{ vol Emerald ICP 1} = \text{mls } 0.5 \text{ N HCL} \times 0.56$$

TEST KIT PROCEDURE

1. Pour a 25-ml sample of **Emerald ICP 1** into a mixing bottle.
2. Add 10-20 drops Bromocresol Purple- swirl bottle to insure complete mixture.
3. Add N-94 Test solution drop-wise while mixing until the solution turns from purple to yellow.
4. Record drops of acid used.

$$\% \text{ vol Emerald ICP 1} = \# \text{ Drops} \times 0.38$$

Revised Date: 03/19/2010

CAUTION

Emerald ICP 1 is a mildly alkaline product and should be handled accordingly. Avoid skin and eye contact. Wear protective clothing, goggles and gloves. Flush exposed areas immediately with clean cold water. Contact a doctor promptly in case of injury.

WASTE DISPOSAL

Discharge spent working solutions and rinse waters to a permitted wastewater disposal system. In order to be completely informed on the latest regulations for your area, please contact the local authorities.

WARRANTY

THE QUALITY OF THIS PRODUCT IS GUARANTEED ON SHIPMENT FROM OUR PLANT. IF THE USE RECOMMENDATIONS ARE FOLLOWED, DESIRED RESULTS WILL BE OBTAINED. SINCE THE USE OF OUR PRODUCTS IS BEYOND OUR CONTROL, NO GUARANTEE EXPRESSED OR IMPLIED IS MADE AS TO THE EFFECTS OF SUCH USE, OR THE RESULTS TO BE OBTAINED.
