

Lusterlume BC

Lusterlume BC is a near neutral, powdered product used for burnishing copper, brass, and steel substrates in oblique tumbling barrels. It may also be used in vibratory finishing mills.

Lusterlume BC is used for “part on part” burnishing as well as with steel, stainless steel, plastic, or ceramic media if desired.

Operating Conditions

Concentrations	1 – 2 oz/Gal
Temperature	Room – 130°F for burnishing, 110°F for drying
Equipment	Any type of burnishing equipment
Media	Part on part, steel shot, or any media presently in use. Protect steel media after use with metal guard 800-D

Caution

Although Lusterlume BC is essentially neutral, avoid skin, eye and oral contact. Wear protective clothing, goggles and gloves when handling Lusterlume BC. If exposed, flush thoroughly with clear, cold water. In case of injury, please contact a doctor.
