

# When It Comes to Vintage Cars and Hot Rods, Good Enough Doesn't Cut It!

As the "World's Fastest Air Conditioning Company," Vintage Air has been supplying high-performance air conditioning components for street rods and performance cars since 1976.

## Surface Finishing was Lacking

"Vintage Air prides itself on the number of processes that we have developed in house," states Allison Chisenhall, Senior Chemical Process Engineer, Vintage Air. "One process that was lacking was our surface finishing. We decided to finally take the next step to develop our own in-house powder coat operation."

## Introduction to Hubbard-Hall

That next step resulted in an introduction to Hubbard-Hall. "We have a fantastic team that values the high-quality products we are known for," Chisenhall emphasizes. "When we designed this process, we wanted the highest quality coating we could achieve. Hubbard-Hall was integral in the design element of the pre-treatment process."

## Results in Costs Savings and Quality Improvements

The resulting process integrated three of Hubbard-Hall's advanced cleaning products: AquaEase PL 86 (an extremely low foam, heavy duty alkaline cleaner), Hubfos 150 (a water-soluble, organic accelerated iron phosphate),

**Better chemistry. Better business.**

and Emerald Seal (an acidic, non-chromated final seal treatment). “These off-the-shelf solutions resulted in substantial cost savings and quality improvements when compared to alternate pre-treatments we considered, such as other methods of chemical and mechanical processing,” Chisenhall is proud to point out.

**Outcome**

“Hubbard-Hall won this business and our confidence based on their expertise and the exceptional level of service they provided,” says Chisenhall. “I trust that if issues ever arise, Hubbard-Hall will support us through them. That means the world to us!”

**Our people. Your problem solvers.**
